Classes

[__builtin__.object](#)

[FillBucket](#)

class **FillBucket**([__builtin__.object](#))

Methods defined here:

__init__(self, main, plot_type='fill')

create_doubled_lattice(self)

define_kagome_lattice(self)

fill_inside(self, arr)
Fill inside

arr: (m x n: boolean ndarray)

plot_all(self, plot_type=None)

Data descriptors defined here:

__dict__
dictionary for instance variables (if defined)

__weakref__
list of weak references to the object (if defined)
